Sunday: UCONN Stamford 1 University Place Stamford, CT 06901
 Weekday: The Pre-School Building at Second Congregation Church Room#19 139 E. Putnam Avenue, Greenwich, CT 06830

Summer Camp	Description	Grade	Add'l Info	Wk	day/time
Math Enrichment for Elementary Students	Help your child broaden mathematical horizons and explore concepts not commonly taught in schools. This class is for the math student that genuinely enjoys math and thinking outside the box. It is also a good exposure class for students interested in competition math in middle school. (Please note not all topics are related to competition; some are recreational and meant to make students think in a way they wouldn't normally.)	3-5	UCONN	8	Sundays/12:45pm
Math Enrichment for Middle School Students	The purpose of our math enrichment program is to provide a stimulating environment for aspiring students who want to gain a deeper understanding of mathematics. In addition, we also prepare students for the AMC8 and MathCounts competitions, which are nationwide math contests for middle school students. Our program values creativity and originality over drilling and memorization in the mathematical learning process.	6-8	UCONN	12	Sundays/12:45pm
